

You are invited to attend the

Ontario Archaeological Society Toronto Chapter Meeting

Wednesday, March 21, 2018

7:30 pm

**19 Russell Street, Department of Anthropology
University of Toronto, St. George Campus
2nd Floor Boardroom, Rm. 246**

There will be a speaker, light refreshments, and time to socialize.

Dr. Carla Parslow, Associate, Senior Archaeologist, Golder Associates
***Water Level Management on the Rainy River and Indirect
Impacts to Archaeological Sites***

Research on water level management practices and their impacts to archaeological sites along the Rainy River undertaken in 2015-16 completed three main tasks: collecting data on known archaeological sites on the U.S. and Canadian sides of the river; integrating the data with results of the hydrologic/hydraulic analyses of the river; and determining and documenting how previous and current water level management conditions affect the archaeological sites on the river.

Results show that water levels prescribed by current management strategies don't directly impact the sites. However, there is observed erosion and cultural vulnerability of some sites.

This erosion is the result of several factors that are indirectly influenced by water level management strategies.

We encourage all interested persons to attend Toronto Chapter meetings free of charge and invite you to become a member of the OAS and the Chapter. Bring a friend!
